DBMS LAB 10-PROCEDURES

1)Retrieve Student Details Using IN Parameter:

```
1 • CREATE DATABASE CollegeeDB;
2 • USE CollegeeDB;
3
4 • CREATE TABLE Student (
5     Student_ID INT PRIMARY KEY,
6     Student_Name VARCHAR(50),
7     Course VARCHAR(50),
8     Marks INT
9 );
10
11 • INSERT INTO Student VALUES
12     (101, 'Aarav', 'CSE', 80),
13     (102, 'Anaya', 'ECE', 67),
14     (103, 'Krishna', 'Mechanical', 96),
15     (104, 'Roman', 'EEE', 93);
16
17
18 DELIMITER //
19
20 • CREATE PROCEDURE GetStudentDetails(IN p_student_id INT)
21 BEGIN
22     SELECT *
23     FROM Student
24     WHERE Student_ID = p_student_id;
25 END //
26
27 DELIMITER ;
28
29 • CALL GetStudentDetails(103);
```

Result Grid

Filter Rows:

Export:

	Student_ID	Student_Name	Course	Marks
▶	103	Krishna	Mechanical	96

2) Calculate Total and Average Using IN and OUT :

```

1 • CREATE DATABASE ResultDB;
2 • USE ResultDB;
3
4 DELIMITER //
5
6 • CREATE PROCEDURE CalculateResult(
7     IN p_dbms INT,
8     IN p_ai INT,
9     IN p_python INT,
10    OUT p_total INT,
11    OUT p_average DECIMAL(5,2)
12 )
13 BEGIN
14     SET p_total = p_dbms + p_ai + p_python;
15     SET p_average = p_total / 3;
16 END //
17
18 DELIMITER ;
19
20 • CALL CalculateResult(
21     88,
22     92,
23     84,
24     @total,
25     @average
26 );
27
28 • SELECT
29     @total AS Total_Marks,
30     @average AS Average_Marks;

```

Result Grid		Filter Rows:
	Total_Marks	Average_Marks
▶	264	88.00

3)Update Salary Using INOUT :

- ```
CREATE TABLE Employee (
 Emp_ID INT PRIMARY KEY,
 Emp_Name VARCHAR(50),
 Salary DECIMAL(10,2)
);
```
- ```
INSERT INTO Employee VALUES
(101, 'Deepa', 75000);
```
- ```
INSERT INTO Employee VALUES
(102, 'Anantha', 90000);
```
- ```
DELIMITER //
```
- ```
CREATE PROCEDURE IncreaseSalary(
 IN p_increment_percent DECIMAL(5,2),
 INOUT p_salary DECIMAL(10,2)
)
BEGIN
 SET p_salary = p_salary + (p_salary * p_increment_percent / 100);
END //
```
- ```
DELIMITER ;
```
- ```
SET @salary = 90000;
```
- ```
CALL IncreaseSalary(15, @salary);
```
- ```
SELECT @salary AS New_Salary;
```

| Result Grid |            |  |  |
|-------------|------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
|             | New_Salary |                                                                                   |                                                                                   |
| ▶           | 103500.00  |                                                                                   |                                                                                   |
